OSU!

I am writing to all colleagues, clubs and all the people that practice Kyokushin karate in general who want to participate in this initiative that we have carried out from Kyokushin-kan Spain.

After having known Kancho Royama's kyokushin karate for a few years, personally I think it is an organization with great power and development at a technical and human level in all aspects, personally I believe that karate have improve a lot with the contribution of the legacy of Sosai Oyama and its It is gradually introducing us to the path of Budo as a way to improve as people or human beings in general.

We recently participated in the tournament from the Shinkyokushinkata world and we thought that the "Kumite Technology" was a spectacular platform, the tournament had a great organization, was a great event and we had a nice time, the experience of being the participants in the club, reviewing, warming up and helping and encouraging a respectful way to each other made a healthy and positive coexistence and reinforced our vision and skill in kata.

On May 1st we are going to organize the European Kata and Kobudo Online Cup, open to all countries in the world and to all organizations, always logically using our form and technique, we hope and encourage you to participate and prepare for this event since the main objective is to improve on a personal level and become great Kyokushin practitioners.

Sincerely,

Ricardo Gómez
